LauzHack

Sponsorship

Hackathons are invention marathons. Programmers, designers, builders and more come together to learn, build, and share their creations over the course of a weekend. It is not limited to CS students; anyone with an interest in technology can participate.

LauzHack is a student-run hackathon which will take place on **November 2016** at **EPFL**, the Swiss Federal Institute of Technology in Lausanne. During the hackathon, **200 participants** will spend **24 hours** building anything they can dream of, and prizes will be awarded to the best projects at the end. The hackathon is organized in association with the EPFL Computer & Communication Sciences Students Association (CLIC), as well as **Major League Hacking (MLH)**.

Your company can use LauzHack as a giant testing ground to let participants build all kinds of projects around your APIs and tools. You can host a tech talk during the event to demo your platform's capabilities, offer a challenge to students, and award prizes for the best entries.

LauzHack also lets you **meet driven and talented students** from all around Europe. This is a great opportunity for recruiters; participants will be strongly encouraged to submit their resumes, which we can forward to you.

We offer three levels of sponsorship:

- **Bronze** allows you to be at the hackathon at a small cost, and raise brand awareness.
- **Silver** lets you present your APIs and tools with a tech talk and a custom challenge.
- **Gold** gives you recruitment opportunities, as well as a larger influence over the event.
